

LDF Green Business Network Meetings 2020

Do you relate to any of the following?

- ♦ *Want to know more about the 'green' business opportunities available in this area*
- ♦ *Want to start being a 'greener' business but at a cost that doesn't stop business*
- ♦ *You have already made green business decisions and are happy to share the **pros** and **cons***
- ♦ *Have ideas you want to share to see if anybody else has already tried*
- ♦ *Have ideas that you want to share because you think they will work*

We want to facilitate a discussion over the course of six meetings in the National Park HQ, Murley Moss, Kendal.

If you are at the start of your environmental journey, or an award winning green business, come and share your experiences and opportunities. Let me know if you would like to do a short presentation that you feel could help other

We will have guest speakers who can share their knowledge and in some cases are the influencers and decision makers in the area.

Our first guest is Danny Coward, the Low Carbon Co-ordinator for The National Park who will be sharing the, 'Benefits of Climate Change Action for and by Business'.

The first three meetings will be in Kendal. The following meetings planned for later in the year will be located in a more central location.

I will be capturing the information from these meetings and will create an agenda for a one day conference in October. We will invite experts for the morning and break into industry workshops for the afternoon. This strategy of meetings is going to be pragmatic and useful.
