Do you relate to any of the following?

- ◆ *Want to know more about the 'green' business opportunities available in this area*
- ◆ *Want to start being a 'greener' business but at a cost that doesn't stop business*
- ◆ *You have already made green business decisions and are happy to share the **pros and cons***
- ◆ *Have ideas you want to share to see if anybody else has already tried*
- ◆ *Have ideas that you want to share because you think they will work*

Supported by Cumbria Tourism

We want to facilitate a discussion and host experts over the course of 5 meetings leading to a one day conference and a series of workshops. If you are at the start of your environmental journey, or an award winning green business, come and share your experiences and opportunities. Let me know if you would like to do a short presentation that you feel could help other businesses.

Meeting 1:

- a. Danny Coward - Low Carbon Co-Ordinator for Lake District will outline the benefits of managing your carbon footprint in business.
- b. How to measure your carbon foot print
- c. Announcement of the Euro Grant for green business. Businesses will be eligible to apply for carbon reduction tools for their business

Meeting 2:

- a. Full explanation of how to be eligible for a Euro Grant for green business tools
- b. Full explanation of the LDF 0 Carbon Fund. Alternative way to off-set your carbon footprint by supporting local projects that reduce the carbon footprint of Cumbria

Meeting 3:

A platform for businesses to share what has and has not worked in terms of green business practices. Several businesses have been lined up to present for 5- 10 minutes each. Then the floor will be open to anybody who wants to share.

We will be capturing all the information and feedback from these meetings to feed into the next meetings and conference in November. The location will be moved to central Lakes after the first three
